Father Hubert delivered a sermon in French, in which he spoke of the bride and bridegroom as a man who, by his genius and eminent attainments and high moral character, had shed lustre on his native state, and who also spoke of the great principle which was illustrated in the life of the deceased. He was a man of profound learning, well versed in science, and yet he was a humanist in the best sense of the word. He had both the head and the heart, and it could then said that the more a man knowledge, the more he was a humanist. He proved in the life of Prof. Dimitry, that he had penetrated far into the recesses of human knowledge, and had extended the boundaries of science, but with all this he had the heart of a child, and the heart of a child which is the Christian's only trust.

The venerable Father was deeply moved and spoke with tears in his eyes, and his voice was broken at times, and his discourse affected with visible emotion many in the congregation who had known and loved the eminent man to whose remains the last rites of the church were paid.
